

From the Desk of Mark Pugh

We welcome the fall and winter to finally cool us off! With the change of season, we have started our bi-weekly rotation; Pugh's Earthworks will now mow the grass every two weeks. We will also begin to install fall flowers and mulch in preparation for the cooler weather. Toward the end of October and the beginning of November, we will begin irrigation shut-down.

In the fall and throughout the winter, you can have a picture-perfect lawn. It is not too late to give us a call and schedule an appointment for us to take care of the work for you. Pugh's Earthworks is your full-service landscaping installation and maintenance company...no matter the season!

Check out our website to find out more about lawn maintenance care and other services we provide.

- Mark Pugh

Mission Statement

To the end, we commit ourselves to strive, in all we do, for total customer satisfaction.

Pugh's Tips & Clips

Preparing for cooler weather

Don't think that just because it is colder outside that your gardening and lawncare has come to an end. Here are tips can get your lawn and garden through the season:

- Plant while the ground is still warm.
- Keep a lookout for pests. There will still be warm days in the fall, and that can attract pests to your garden.
- Water trees and shrubs deeply one last time before the onset of winter, especially the newly planted ones.
- Clean up debris in your lawn and garden. Leaves, sticks, rocks, and other late-season leftovers can harm next year's lawn and harbor pests over the winter.

In general, make sure you drain the water from your garden hoses, coil them, and store them in a spot where they won't freeze. Get your tools and your lawn mower ready for the off-season with a little simple maintenance.

If you refer a friend that utilizes our services, you will receive \$100 off your next improvement and/or upgrade of your current landscape maintenance or irrigation service. Please contact our office at 901-546-0099 or by e-mail.
